

## **Appendix 8: Podcasting and screen capture courses offered by Oxford University Computing Services**

### **Multimedia: An introduction to podcasting for education**

Podcasting is a method of distributing multimedia files (such as audio programs or music videos) over the Internet, for playback on mobile devices and computers. In this session aimed at novices, we will record, edit and publish an educational podcast using Audacity the simple, free audio editor.

Duration: half day

Frequency: every term

### **Multimedia: Screen and audio capture for teaching**

How can you turn your PowerPoint slides and screen demonstrations into online resources? Screen capture is one of the fastest growing types of podcast in the HE sector. In this course you will learn to create professional eLearning content with advanced interactivity using Captivate screen capture software.

Duration: half day

Frequency: every term

### **Multimedia: Podcasting at Oxford FAQs**

If you already create podcasts but have some unanswered questions, come along to this session.

Duration: 1.5 hours

Frequency: every two week during term time

### **Multimedia: Podcasting - The secrets of presenting to camera**

One of the great joys of the podcast revolution is the ease of creating video and audio podcasts, but producing one that your audience will want to watch or listen to takes a bit more know-how. Learn how to be professional and confident in your video and audio presentations! This one-day workshop provides tips and techniques for creating effective podcasts that will engage your listeners.

Duration: full day

Frequency: every term if there is demand

### **Final Cut 101: An Introduction to Final Cut Pro 7**

If you want to edit and adapt your video material to produce professional looking resources, you need to attend this course.

Duration: Full day

Frequency: according to demand
